

Net Out-tourism

This map shows those territories where the number of residents taking foreign holidays outweighs the number of international tourists visiting.

The map is dominated by Germany, the United Kingdom, the Czech Republic, Malaysia and Poland. German residents make 70.7 million tourists trips per year, but only 18.4 million international tourist trips are made to Germany: the net out-tourism for Germany is therefore 52.3 million visits. Residents of Western and Eastern European territories together constitute over two-thirds of the net out-tourists in the world.

Technical notes

- Data source: World Bank, World Development Indicators, 2005, table 6.14
- Negative values are not shown.
- The graph shows the total of territories' net out-tourist visits (when positive) in each region.
- Here tourists are international overnight visitors.
- See website for further information.

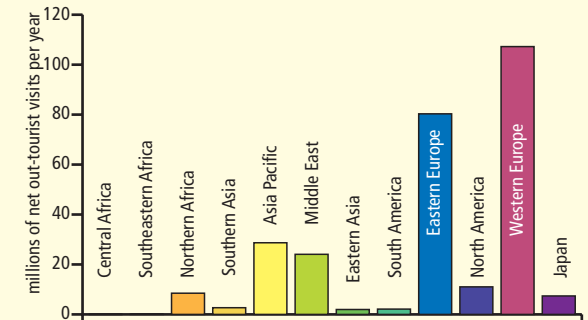

HIGHEST RATES OF NET INTERNATIONAL OUT-TOURISM

Rank	Territory	Value	Rank	Territory	Value
1	Czech Republic	285	11	Latvia	52
2	Antigua & Barbuda	144	12	Finland	52
3	Hungary	107	13	Sweden	48
4	Malaysia	99	14	Bosnia Herzegovina	46
5	Germany	63	15	Serbia & Montenegro	45
6	Denmark	60	16	Netherlands	42
7	Switzerland	60	17	TFYR Macedonia	42
8	Poland	60	18	Oman	41
9	United Kingdom	57	19	Estonia	39
10	Lithuania	52	20	Israel	33

annual out-tourist visits as a % of population

TOTAL NET OUT-TOURISM

“It is the British and other Northern Europeans who spend their summer vacations chasing the sun.”

B. Vaughan, 2002
