## **Domestic Water Use**

Water for domestic purposes includes drinking water, use for public services, commercial service establishments (such as hotels), and homes. 325 billion cubic metres of water are so used worldwide each year. The world average water use per person is 52 cubic metres per year.

There is huge variation in water use per person. Between 1987 and 2003 people living in Cambodia, where the majority do not have access to improved water supplies, used an average of 1.8 cubic metres of water each. People in Costa Rica used one hundred times more. The residents of Australia on average each use another 300 cubic metres again per year - much to water their lawns and fill pools.

Territory size shows the proportion of all water used for domestic purposes that was used there.

## Land area

- **Technical notes**
- · Data are sourced from the World Bank's 2005 World Development Indicators \*Territories which assumed the regional average,
- due to missing data, are not shown in the table Domestic water use is all piped water use except
- for industry and agriculture See website for further information.

## HIGH AND LOW DOMESTIC WATER USE

| Territory            | Value | Rank | Territory                    | Value |
|----------------------|-------|------|------------------------------|-------|
| Australia            | 487   | 191  | Democratic Republic of Congo | 4.8   |
| Armenia              | 281   | 192  | Chad                         | 3.9   |
| Canada               | 259   | 193  | Ethiopia                     | 3.5   |
| New Zealand          | 242   | 194  | Benin                        | 3.5   |
| Cuba                 | 225   | 195  | United Republic of Tanzania  | 3.0   |
| United States        | 209   | 196  | Mozambique                   | 2.9   |
| Singapore            | 203   | 197  | Uganda                       | 2.6   |
| Costa Rica           | 184   | 198  | Somalia                      | 2.5   |
| United Arab Emirates | 174   | 199  | Mali                         | 2.2   |
| Ecuador              | 159   | 200  | Cambodia                     | 1.8   |

cubic metres of domestic water use per person per year, 1987-2003\*

"I remember when I was 14, carrying a 20 litre water can on my head, filling it from a river some thirty minutes away. When I came to Canada, I was shocked by the extravagant use of water here." Sieru Efrem, 2003 Map 324
