

Natural Product Imports

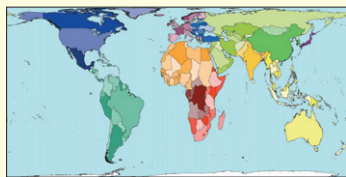

Three-quarters of all 200 territories are net importers of natural products.

The landlocked, mountainous Andorra imports (net) over US\$600 more natural products per person than its neighbour, France. This difference in imports per person is due to exports from France almost balancing imports. Andorra produces almost no natural products to export.

The Central African Republic, another low net importer, receives low imports and generates low exports of natural products.

Territory size shows the proportion of worldwide net imports of natural products (in US\$) that are received there. Net imports are imports minus exports. When exports are larger than imports the territory is not shown.

Land area

MOST AND LEAST US\$ OF NET NATURAL PRODUCT IMPORTS

Rank	Territory	Value	Rank	Territory	Value
1	Andorra	609	139	Uganda	1.32
2	Greenland	359	140	Madagascar	1.01
3	Bahamas	314	141	Rwanda	0.94
4	Qatar	305	142	Ukraine	0.71
5	Tuvalu	260	143	United Republic Tanzania	0.63
6	United Arab Emirates	258	144	Central African Republic	0.54
7	Bahrain	234	145	Bhutan	0.41
8	Cyprus	225	146	Mali	0.28
9	Norway	216	147	France	0.27
10	Saint Kitts & Nevis	208	148	Japan	0.09

US\$ worth of natural produce imports per person living in that territory*

REGIONAL NET NATURAL PRODUCT IMPORTS

Technical notes

- Data source: United Nations Conference on Trade and Development, 2002.
- *There were no net natural produce imports recorded for 52 territories.
- Natural products include rubber, animal feed and leather.
- See website for further information.

“Saudi Arabia has tightened restrictions on trading in wildlife animals in a renewed attempt to ensure protection of rare animal species”

M. Ghazanfar Ali Khan, 2004
