

Machine Exports

Only 19 territories are primarily exporters (net US\$) of machines; 181 territories are net importers of machines. Machines include engines, turbines and pumps. Also included are machines for making food, working metal and binding books.

Earnings from machines account for 10.5% of all earnings from international exports worldwide. These earnings are almost exclusively made in Western Europe and Japan. Of all the net exporting territories, Switzerland earns the most per person from its machine exports (US\$ net). No territories in 7 of the 12 world regions are net exporters of machines.

Territory size shows the proportion of worldwide net exports of machines (in US\$) that come from there. Net exports are exports minus imports. When imports are larger than exports the territory is not shown.

Land area

MOST AND LEAST US\$ OF NET MACHINE EXPORTS

Rank	Territory	Value	Rank	Territory	Value
1	Switzerland	1075	...	Western European Average	246.16
2	Germany	659	13	United Kingdom	83.51
3	Denmark	506	14	Netherlands	46.89
4	Italy	502	15	Czech Republic	24.85
5	Sweden	486	16	Taiwan	24.22
6	Austria	485	17	France	22.17
7	Finland	441	18	United States	1.61
8	Japan	423	19	Hungary	0.84

US\$ worth of machine exports per person living in that territory*

REGIONAL NET MACHINE EXPORTS

Technical notes

- Data source: United Nations Conference on Trade and Development, 2002.
- *There were no net exports of machines recorded for 181 territories. For 4 territories in Western Europe the regional average was used.
- Only the top and bottom eight net exporters are shown in the table, because only 19 territories are net exporters of machines.
- See website for further information.

“There in the flickering light of the lamp was the machine sure enough, squat, ugly, and askew; a thing of brass, ebony, ivory, and translucent glimmering quartz.”

H. G. Wells 1898
