

# Male Mortality 15-60 Year Olds

The highest number of premature deaths of men and boys between ages 15 to 60 years old in 2003 were in India and China; followed by the Russian Federation, Indonesia and Nigeria. Part of the reason for these high counts is the large population of these territories.

The most premature deaths of men and boys between ages 15 and 60 were in African territories. Lesotho has the highest rate: 91 deaths per 100, meaning that most of the male population will not live to the age of 60. Low death rates amongst the males aged 15 to 60 are found in Switzerland, Israel and Singapore.

Territory size shows the proportion of all deaths of men and boys expected to die prematurely between the ages of 15 and 60 years worldwide, there in 2003.

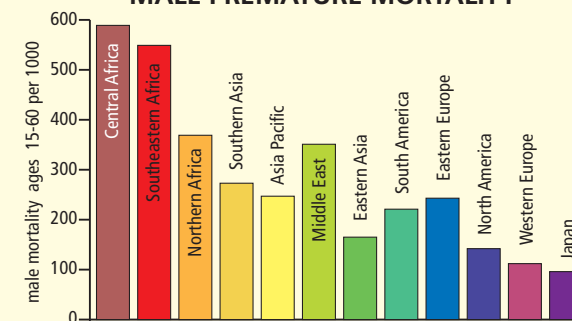

Land area

## MOST AND LEAST PREMATURE MALE ADULT MORTALITY

Rank	Territory	Value	Rank	Territory	Value
1	Lesotho	912	188	Netherlands	93
2	Swaziland	894	192	Israel	92
3	Botswana	850	193	Switzerland	90
4	Zimbabwe	830	194	Australia	89
5	Zambia	719	195	Singapore	87
6	Burundi	654	196	Malta	84
7	Malawi	652	197	Iceland	81
8	South Africa	642	198	Sweden	79
9	Central African Republic	641	199	San Marino	73
10	Mozambique	621	199	Kuwait	73

premature male mortality (between ages 15-60 years) per 1000, 2003

## MALE PREMATURE MORTALITY
